# Curtains

Our curtains are carefully sewn by talented technicians at our local workshop. We have hundreds of quality fabrics and patterns from top suppliers.

## *Curtains Lining*

Standard lining - lightweight lining allowing light to come through

Blackout lining - blocks out more light for an ideal solution for bedrooms

Thermal lining - a heavyweight curtain to help retain heat in the winter

Voiles - pair up with curtains for extra light, daytime privacy and an airy stylish finish

How about adding to your curtains our Roman Blinds? Our curtain fabrics are suitable for Roman Blinds. You can use the same fabric or choose any other complementary one to add more interest.

*Made to Measure Curtains  
will bring remarkable  
elegance to any room.*

Our Consultant

### *Curtain Headings*

Wave Curtain - shapes into soft, wave like folds, connected to track

Eyelet Curtain - only suitable for poles, threaded on to a pole, easy to open and close

Pinch Pleat - suitable for pole or track, fabric gathered together and stitched for an elegant finish

Pencil Pleat - for pole or track, single pleats are formed in neat, tightly folds

If you desire any other headings our consultant will discuss your options, together with other aspects like curtains length. We recommend full length curtains (from pole/track to floor). Alternatively you can choose a "puddle" finish where the fabric gathers on the floor; ideal for curtains rarely opened or closed.

*Pinch Pleat Curtain*

*Pencil Pleat on Track, Bay Window*

## *Curtains Track or Pole?*

Tracks are more discreet and often fully hidden behind the fabric. They can be attached to room ceiling or window top frame which is their advantage. For tracks there are more options with controls, including motorised curtains.

Poles are more decorative and you can choose within metal or wooden pole. You can manipulate the height of the pole but they can't be fitted to the bay windows like bendable tracks.

## *Motorised Curtains*

Motorised Curtains - electric tracks are ideal for difficult to reach, heavy, large curtains. We offer total flexibility on control.

Operation available via a switch, remote control, app, home control hub. We cooperate with top suppliers like Silent Gliss or Somfy.

*Eyelet Curtain on Pole*

### *Accessories*

We offer a wide range of metal and wooden curtain poles with elegant finials (the decorative end of the curtain pole).

Other accessories include matching tie backs or hold backs to hold the curtain neatly at the side.

A stylish addition is an elegant pelmet or valance which is the decorative framework over the curtain top; with valances being the softer fabric version.

Finally matching cushions will provide the finishing touch.

### *Fabrics*

Plain or pattern? What kind of textile? It is all individual preference. Your room design, colour scheme will help to determine the best choice. Your consultant is happy to help.
