BLINDS

Roller Sheer Fabric

Roller Blinds are very functional. Any room and window can benefit from them.

Roller Blinds

Our Rollers are carefully made by talented technicians at our local workshop. We have hundreds of quality fabrics, components and accessories from the top suppliers.

Roller Fabric Types

Sheer Fabric - light and transparent fabric acting similar as net curtain.

Dim-out Fabric - standard fabric that partly dims out the light, it is good for privacy control in dining and living rooms.

Blackout Fabric - a thicker roller fabric with extra layers for better light blocking, ideal for bedrooms.

Front Roller (reverse) - where front of the fabric falls forward of the roll, it gives extra space for window handles.

Back Roller (regular) - the front of the fabric rolls behind the top roll, it keeps the fabric closer to the window and allows less light to come through.

Double Roller Blinds - combine two rollers in one system for extra decorative or privacy effect.

Roller Accessories

Main components to consider are Roller Cassettes and Roller Bottom Bars. We offer two different types: Louvolite and Eclipse System. Alternatively Roller can have a simpler version without any covering cassette. Metal bottom bar can be replaced with plastic bar wrapped in material.

Control System

Our standard Roller is operated by nickel plated chain with attached child safety - easy break chain connector. Other control systems include: Magic Wand - it is operated by batteries and easy, fun system for children . Slow rising Roller System - with attached spring and no cords. Motorised Blinds - operated by remote control, smart phone, tablet, voice control. We also supply Silent Gliss and Somfy motorised systems.

Special Fabrics

FR fabrics - flame retardant fabrics.

Pollergen TM - Anti-allergen fabrics for blinds. They act as a barrier against pollen entering your home.

Asc - Advanced Solar Control, the back of the blind has a special surface to reflect sunlight helping you to control light levels and temperature entering the room.

Water resistance fabrics - PVC fabric are special plastic coated fabric, what make them waterproof and fire retardant too.

Great solution for bathrooms and busy kitchens.

Ultra Fresh Fabrics - preserves fabric freshness by eliminating bacteria and fungi.

Plain or Pattern fabric? We have a vast collection of plain fabrics in many colours, together with hundreds of pattern fabrics, including wonderful prints. How about a photo-roller with the picture of your individual choice.
